

FlexForge — Test Cases & Report

JUnit 5 + Spring Boot @SpringBootTest (H2) · v0.1.0 · 2026-06-24

Summary

Metric	Value
Total tests	29
Passed	29
Failed	0
Pass rate	100%
Suites	9 (Engine, Security, Features, Relations, Endpoints, Crypto/File, Encryption, Flow, Realtime)

Test Cases

ID	Type	Title	Expected Result	Status
TC-01	Engine	REST CRUD round-trip	201 create; reads back; 404 after delete	PASS
TC-02	Engine	GraphQL mutation + query	record created and listed via GraphQL	PASS
TC-03	Security	Unauthenticated rejected	HTTP 401	PASS
TC-04	Security	Role-gated write	ADMIN 201; VIEWER 403; VIEWER read 200	PASS
TC-05	Security	Bad credentials rejected	HTTP 401	PASS
TC-06	Validation	Bad email / missing required	HTTP 400 with errors[]	PASS
TC-07	Functional	Search operators (_like / eq)	filtered results returned	PASS
TC-08	Security	Metadata hides secrets	no jwtSecret/password in /__meta	PASS
TC-09	Functional	OpenAPI generated	openapi=3.0.3 with paths	PASS
TC-10	Functional	Admin UI served	200; contains 'FlexForge Admin'	PASS
TC-11	Functional	Relation + auto timestamps	Order links; createdAt/updatedAt set	PASS
TC-12	Validation	Referential integrity	HTTP 400 on missing reference	PASS

ID	Type	Title	Expected Result	Status
TC-13	Functional	Endpoint missing param	HTTP 400; mentions 'who'	PASS
TC-14	Functional	Endpoint json action	200; message=pong	PASS
TC-15	Functional	Endpoint missing header	HTTP 400; mentions X-API-Key	PASS
TC-16	Functional	Endpoint wrong method	HTTP 405	PASS
TC-17	Functional	Endpoint header ok	200; accepted=true	PASS
TC-18	Security	Encrypted field round-trip	ssn returned decrypted	PASS
TC-19	Functional	File upload/download/base64	bytes match original	PASS
TC-20	Unit	AES round-trip + cipher differs	decrypt==plain; cipher!=plain	PASS
TC-21	Unit	Non-deterministic ciphertext	two ciphers differ; both decrypt	PASS
TC-22	Unit	Base64 round-trip	bytes preserved	PASS
TC-23	Functional	Flow expression interpolation	{message:'Hello Ada'}	PASS
TC-24	Functional	Flow db step creates record	record visible via REST	PASS
TC-25	Functional	Flow condition branching	pass / fail by score	PASS
TC-26	Functional	CRUD emits change events	create event in /realtime/recent	PASS
TC-27	Security	CRUD is audited	create entry in /__audit	PASS
TC-28	Functional	Idempotency-Key prevents dup create	replay returns same record (200)	PASS
TC-29	Functional	AI step (stub) + notify step	summary returned; notification recorded	PASS
